ACEP Lubricant Enhancer formulated with **MasterProtect**® is a proprietary product that has been shown to improve the performance of the Automotive A/C System. This treatment chemically creates a "Boundary Film" that reduces metal wear and improves Thermal Efficiency resulting in better A/C System performance.

- Improves Automotive A/C System performance.
- Improves Compressor efficiency – reducing Compressor drag on the Engine – increasing fuel economy.
- Helps extend Compressor Life by reducing friction and metal wear.
- Easy to Install.
- Increases Thermal efficiency with "Boundary Film" in Condenser and Evaporator Cores.
- Keeps Acids and Corrosion caused by moisture away from metal surfaces with the "Boundary Film".
- Does Not Contain: Chlorine, Phenyl Phosphate, Teflon, Silicone or Imodium Cordite.
- Compatible with all OEM (R12 & R134a) Refrigerants.
- Compatible with all Mineral, PAG and Ester Refrigerant Lubricants (Exc. Hybrid).
- One Treatment for life of A/C Compressor and A/C System.
- Treatment size of 1 oz Concentrate does not require any original Lubricant removal.
- Contains U.V. Dye for Leak Detection.
- Meets and exceeds SAE J2670 Standards.

Longer Compressor Life & Increased Thermal Efficiency

Over time, Automotive A/C Systems experience metal to metal wear inside the Compressor. The Condenser begins to form a deposit of baked-on Lubricant 3-4 mil thick on the inner walls caused by high temperature and A/C System Pressure. The Condenser and Evaporator begin to pool and collect Lubricant at the bottom of the cores. The combination of deposits and pooling reduces the cooling efficiency of the A/C System and Lubricant return to the Compressor reducing Compressor life and increasing Compressor drag that affects engine efficiency.

ACEP Lubricant Enhancer formulated with **MasterProtect**® is a proprietary combination of friction modifiers and anti wear additives that will bond to metal surfaces. This product increases thermal efficiency, reducing friction and metal wear resulting in colder air, energy savings and extended Compressor Life improving Automotive A/C System performance.

Untreated A/C System Compressor

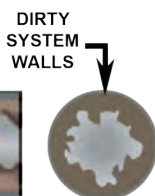

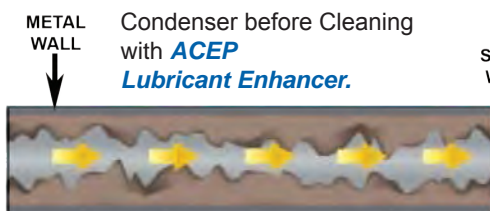

A/C System Compressor Treated with ACEP Lubricant Enhancer Formulated w/ MasterProtect®

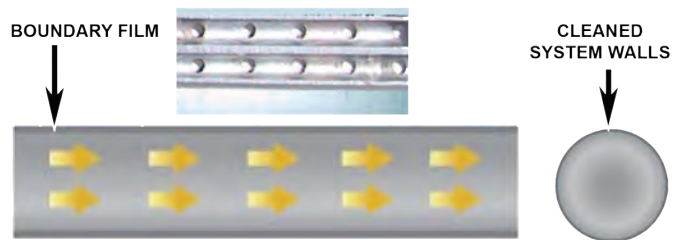

The Chemistry behind **ACEP Lubricant Enhancer** is that it establishes a "Boundary Film" laminating the internal walls of the entire A/C System and Compressor to keep debris such as Metal particles and Teflon deposits away from moving components. The **ACEP Lubricant Enhancer** reduces the Lubricant buildup inside the Heat Exchangers from 3-4ml thickness coating on the walls to a 0.5ml "Boundary Film" significantly improving heat exchange. By chemically placing the Lubricant in the "Boundary Film" the system now has improved Lubricant return to the Compressor and Thermal transfer at the Condenser and Evaporator.

The continuing benefit of **ACEP Lubricant Enhancer** formulated with **MasterProtect**® is the "Boundary Film" prevents acids and moisture from contacting internal metal surfaces and Compressor components. This reduces corrosion from inside the Condenser, Evaporator and Compressors causing leaks and component failures.

Santech – MasterChem™ PAG Lubricants

Premium OEM Single End-Capped Oil

Santech packages OEM Grade PAG46, PAG100 and PAG150. All Viscosities are offered with and without U.V. Dye. PAG46 is equivalent to Delco 10-5040 and the PAG150 is equivalent to Delco 15-118. These are High Quality OEM Service PAG formulations. These Oils are for R134a only, OEM Service and Retrofit.

Ultra Double End-Capped Oil

Developed by OEM Oil Manufacturers this Oil provides better Protection against Metal Wear and Moisture Absorption for Corrosion Protection. The Double End-Capped Technology absorbs the Moisture in the A/C System removing it from contact with Metal surfaces reducing Wear and Corrosion. This Lubricant is compatible with R12 and R134a Refrigerants. These are High Quality OEM PAG Oils.

MasterChem™ Enhanced Lubricant

This Lubricant was developed by leading Industry Chemist. This Proprietary Blended PAG Lubricant offers excellent Protection against Metal Wear and Moisture Absorption for Corrosion Protection. This Product is blended with our MasterChem™ Lubricant Enhancer which provides additional additives to reduce Metal Wear and clean the Condenser internally along with the rest of the System restoring the Thermal Efficiency of the A/C System. These Oils are for R134a only, OEM Service and Retrofit.

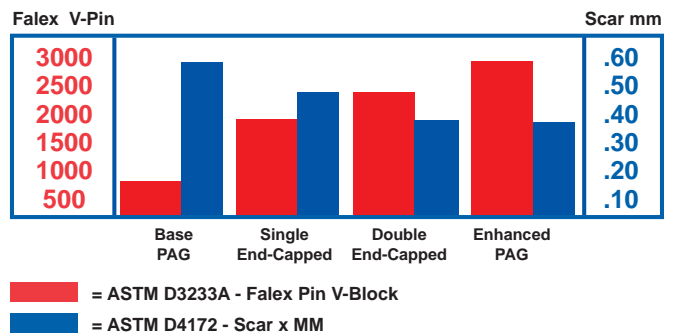

Aftermarket Base PAG Oils

Santech does not supply these type Oils. These Oils usually lack most of the additive packages required for Metal Wear protection and Moisture Absorption for the prevention of Corrosion. They are usually "Price Competitive" offerings in the Market being compared to the higher quality oils.

Overview

Lubricants are subjected to (2) basic test. The Falex Pin & Vee Ball Force lbs Failure (ASTM D3233A) and the 4 Ball Scar Value mm (ASTM D4172) Test. The chart below shows the Failure & Scar averages of Industry Lubricants. The Chart shows test results based on the quality and type of the Oil. Bottom line, the higher the Falex Failure and the lower the Scar the better the lubricant.

LOKTRACER™ THE REVOLUTION IN LEAK DETECTION

Finding A/C Leaks Fast

The **MT7000 LOKTRACER™** was especially developed for trace gas leak detection in vehicle air-conditioning systems. The unit reacts exclusively to tracer gas, so that cross sensitivity to other gases can be almost completely excluded.

The extra-long and highly flexible measuring probe also allows to check components in the engine compartment which are difficult to access.

Eliminates the need to recover and recycle A/C refrigerant gases reducing equipment cost and expense of lost refrigerant. Tracer gas is Hydrogen/Nitrogen and can be released into the atmosphere.

- ▶ Rechargeable Battery w/ Charger
- ▶ Earphone
- ▶ 8 Hours of Operation
- ▶ Sensitivity 0.03 oz. per year

MT7000 LOKTRACER™ Trace Leak Detector    

LOKTRACER™

Trace Gas Leak Detector System was especially developed for trace gas leak detection in vehicle air-conditioning systems.

MT7000 Trace Gas Leak Detector

- ▶ Rechargeable Battery w/ Charger
- ▶ Earphone
- ▶ 8 Hours of Operation
- ▶ Sensitivity 0.03 oz. per year

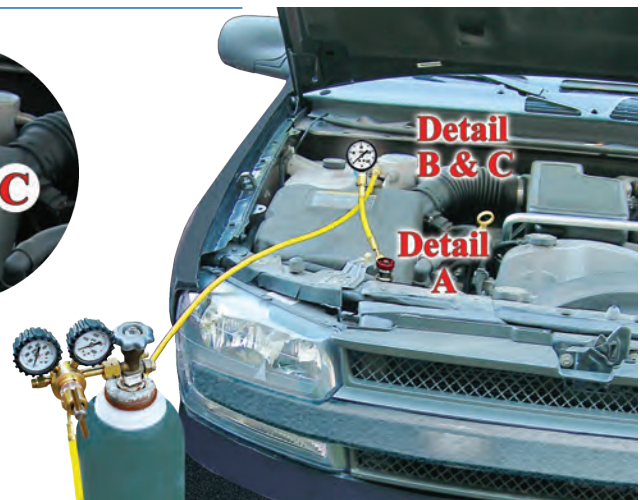

The unit reacts exclusively to Tracer gas, so that cross sensitivity to other gases can be almost completely excluded. The extra-long and highly flexible measuring probe also allows checking components in the engine compartment which are difficult to access.

MT7001 Regulator Kit

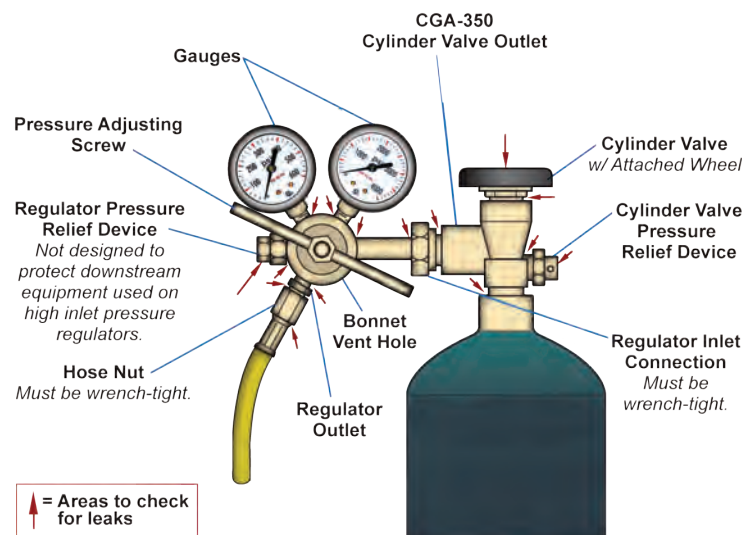

Vehicle Hook-Up

- ▶ Tank Coupler to Low Side
- ▶ 160 PSI Gauge Coupler to Hi-Side

Cylinder Tank Hook-Up

Hydrogen Mix = 95% Nitrogen
5% Hydrogen

Testing Procedures

- ▶ A/C Systems needs to be free of refrigerant before pressurization with tracer gas.
- ▶ Tank Valve - Off.
- ▶ Pressure adjusting screw - screwed out.
- ▶ Connect hi and low side couplers and open.
- ▶ Tank Valve - On.
- ▶ Turn pressure adjusting screw inward to reach 100-150 PSI.
- ▶ The 160PSI gauge can be removed and maximum pressure of 225PSI can be applied if leak not detected on initial check.
- ▶ Tank Valve - off, pressure adjusting screw - screwed out.

Testing Tips

- ▶ Hydrogen is lighter than air - check for leaks above connections.
- ▶ Evaporator leak check - after 10 minutes - check at defroster vents, dash outlets and floor vents.
- ▶ Remove couplers and check valve cores and service ports.
- ▶ Remove shop fans and any wind that can disperse the hydrogen.
