Using exclusively the Double "End-Capped" PAG approved by vehicle manufacturers worldwide. Santech® has developed a unique line of R134a retrofit kits designed for use with specific compressors by vehicle Year, Make and Model. This eliminates duplication of many of the same components in different kits for different models from the same manufacturer.

Available kits are listed below and are packaged in an attractive point-of-purchase carded system to allow retail-type displays.

Retrofit Kits All retrofit kits include the necessary retrofit labels, fittings, gaskets, o-rings, caps and valve cores for each type of compressor listed below.

Universal Kits All universal kits include only the retrofit labels, fittings and caps that are necessary.
