62 BLOWER MOTOR + RESISTOR KITS FOR TOP HIGH FAILURE RATE APPLICATIONS

Blower Motor + Resistor Kits are highly recommended for high failure rate applications because the components - blower motor, resistor/module, and harness (if applicable) - often wear out simultaneously.

Replacing all components ensures optimal performance, prevents future breakdowns, and saves labor costs by addressing potential problems upfront.

ELECTRICAL SYSTEM & DURABILITY TESTING:

- Rigorous voltage and amp draw testing guarantees reliable and efficient operation under varied electrical conditions.
- Ensures long-lasting performance and resilience in diverse operating conditions.
- Precision-fitted and balanced wheel provides a smooth and quiet operation, enhancing the lifespan of the blower motor.

PROTECTIVE PACKAGING:

- Custom-fit padding to safeguards product during shipping, ensuring product arrives in new condition and ready for installation.

OEM QUALITY, FIT & FUNCTION

- Guarantees seamless integration with the vehicle's existing systems for optimal performance.
- Enhances performance and reliability through superior materials and manufacturing processes.

HVAC COMPONENTS BEHIND THE DASH

- **BLOWER MOTOR:** Moves air through the system.
- **RESISTOR/MODULE:** Regulates blower motor speed in response to control inputs.
- **WIRING HARNESS:** Links electrical components to the vehicle's electrical system.
- **ACTUATORS:** Controls the mix of hot/cold air and directs airflow to different vents.
- **EVAPORATOR:** Cools and dehumidifies incoming air.
- **HEATER CORE:** Warms air by transferring heat from the engine's coolant.
- **CABIN AIR FILTER:** Cleans incoming air by trapping dust and debris.
